DETAILED ACTION

Inventorship

1. In view of the papers filed April 22, 2002, it has been found that this nonprovisional application, as filed, through error and without deceptive intent, improperly set forth the inventorship, and accordingly, this application has been corrected in compliance with 37 CFR 1.48(a). The inventorship of this application has been changed by the addition of Sanjay Basak and Krishna P. Murella as inventors.

The application will be forwarded to the Office of Initial Patent Examination (OIPE) for issuance of a corrected filing receipt, and correction of the file jacket and PTO PALM data to reflect the inventorship as corrected.

Election/Restrictions

2. Applicant's election without traverse of species 2 in Paper No. 14 is acknowledged. Claims 6, 7, 20-27 and 38-46 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/052,010 Page 3

Art Unit: 3723

4. Claims 1-4, 8-12, 14-16, 18, and 28-32, and 34-37 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Tsai et al, 2003/0022501 (US Priority date of July 25, 2001). Please refer to the entire disclosure, and in particular paragraphs [0020], [0037], [0038], [0069], [0075], [0077].

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 7. Claims 5, 13, 17 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tsai et al, '501. '501 does not disclose the polishing step occurring at a temperature between 10 degrees C. (approximately 50 degrees F.) and 30 degrees C. (approximately 86 degrees F.). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided '501 with a

Application/Control Number: 10/052,010

Art Unit: 3723

temperature range as claimed, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233. The examiner considers between 50 degrees F. and 86 degrees F. to be ambient room temperature. Barring evidence of criticality to the claimed range, one of ordinary skill would have considered it obvious to conduct the method at normal room temperature ranges. Further, '501 does not disclose that the pretreatment occurs for approximately on to twenty seconds, but does disclose that the first polishing step (pretreatment) can occur for the amount of time required to remove the material desired. It would have been obvious to one of ordinary skill to have provided '501 with a process step of the claimed time interval, to remove the amount of material desired, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 9. Any inquiry concerning the content of this communication or earlier communications from the examiner should be directed to M. Rachuba whose telephone number is (703) 308-1361. The examiner can normally be reached on Monday through Friday from 8:30 AM to 4:00 PM. Any inquiries concerning other than the content of this and previous communications, such as missing references or filed papers not acknowledged, should be directed to the Customer Service Representative, Tech Center 3700, (703) 306-5648.

, Application/Control Number: 10/052,010

Art Unit: 3723

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail, can be reached on (703) 308-2687.

In lieu of mailing, it is encouraged that all formal responses be faxed to 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1148.
